Today’s best-of-breed automated enforcement systems should require minimal interaction. When interaction is necessary, it should be intuitive and not require extensive time or training. The T-Series web-interface offers you full control of all system features.

The interface can be accessed via a network connection with an device running a supported browser and is hosted by the system itself. That means there’s no need for complicated hardware or network set-ups. All controls are intuitively accessible for both operators and service personnel.

**SUPPORTED BROWSERS**
- Microsoft Internet Explorer
- Mozilla Firefox
- Google Chrome 8

**AVAILABLE NETWORK INTERFACES**
- Ethernet
- Wifi IEEE 802.11b/g/n/

**KEY FEATURES**
- Web-based
- Device independent
- Intuitive controls
- Fluent navigation
- Wizard based location setup
- System diagnostics
- Remote software updating
- Accessible anytime
